

JAMSTEP

"Each step is war, and you're winning"

WHITEPAPER LIGHT

Version 1.1 – July 2026

Move-to-Earn Web3 Ecosystem | \$JAMP | BNB Chain

Telegram Mini-App: t.me/JamStepcrypto

01 Introduction & Mission

JamStep is a next-generation Web3 Move-to-Earn (M2E) ecosystem that converts daily physical activity into tangible digital assets via the **\$JAMP** token. By bridging health, fitness, and cryptocurrency, JamStep eliminates the critical barriers that caused legacy M2E projects to fail.

- **Free-to-Play Access:** No expensive NFT purchases or hidden entry fees.
- **Mass Adoption Interface:** Completely intuitive design tailored for cryptocurrency beginners.
- **Telegram-Native Ecosystem:** Instant deployment via a Telegram Mini-App for rapid onboarding.

02 Market Problems & JamStep Solutions

Current Market Challenges	JamStep Next-Gen Solution
Physical Inactivity: Over 27.5% of adults lead sedentary lifestyles (WHO).	Financial Incentivization: Every movement translates into raw cryptocurrency rewards.
Low Retention: Over 70% of fitness app users quit within 3 months due to lack of motivation.	Gamification & Engagement: Continuous motivation via daily challenges, airdrops, and community giveaways.

Current Market Challenges	JamStep Next-Gen Solution
High Entry Barriers: Existing Web3 fitness apps require upfront capital and complex setup.	Zero Financial Friction: Launch directly from Telegram with one click. Experience Web3 through seamless practice.

03 Project Traction & Current Metrics

During its closed testing phase, JamStep has already demonstrated strong community engagement and ecosystem stability:

- **Active Base:** 200+ verified beta testers actively engaged during the Testnet stage.
- **Economic Modeling:** Successfully simulated token distribution logic and finalized the MVP phase.
- **Organic Growth:** Highly viral referral mechanics triggered upon the Alpha Season launch.

Data-driven engagement & economic modeling behind the JamStep engine.

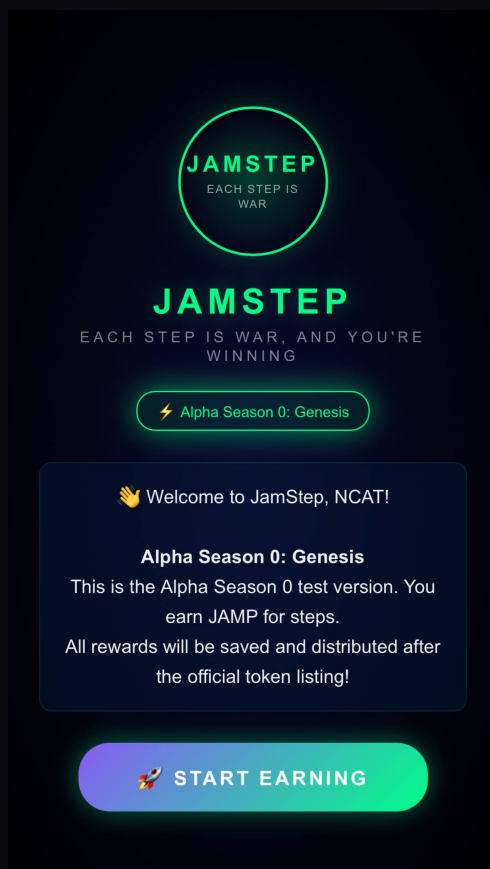

04 MVP Architecture & Anti-Cheat Logic

Temporary MVP System: Due to Telegram API sensor limitations, the current Testnet version uses a secure, timer-based manual verification flow for strategic economic testing.

Anti-Cheat Architecture — to guarantee a fair ecosystem, JamStep enforces:

- A rigid daily limit of 5,000 steps per user to protect tokenomics during the Alpha Season.
- Automated multi-account detection, device fingerprinting, and pattern anomaly analysis.
- **Strict Fair Use Policies:** Automated bans for step-simulators, clickers, bots, or GPS manipulators.

Native Scaling: Direct integration with iOS HealthKit and Android Google Fit will launch with the native application in Q4 2026 / Q1 2027.

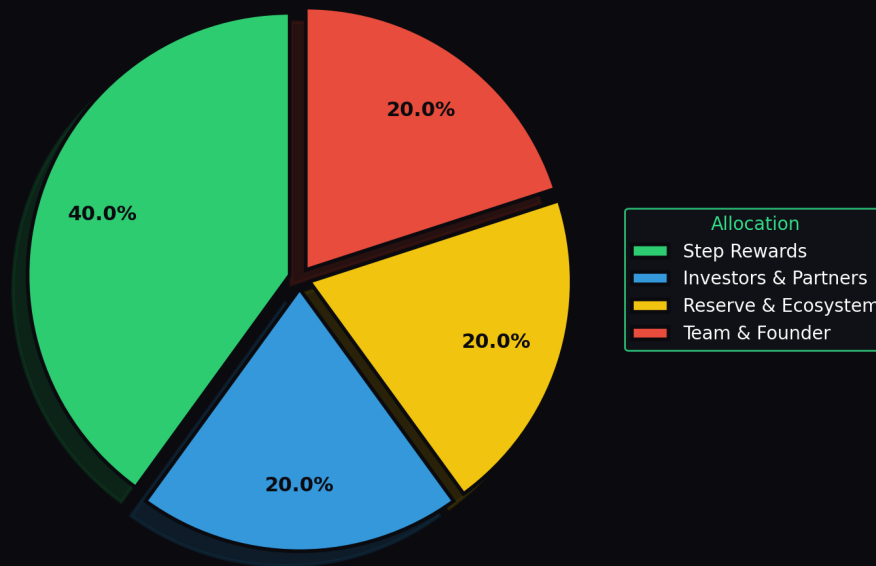

JamStep Telegram Mini-App — Alpha Season 0: Genesis interface.

05 JAMP Tokenomics & Sustainability Mechanisms

Total Supply: 2,000,000,000 \$JAMP | **Network:** BNB Chain

JAMP Tokenomics (JamStep) - Allocation Overview

JAMP Token Allocation Matrix — 2,000,000,000 total supply.

Allocation	Share	Details
Step Rewards	40% (800M)	Distributed across limited-supply seasonal pools to guarantee asset scarcity.
Investors & Partners	20% (400M)	12-month cliff followed by a 24-month linear vesting schedule.
Reserve & Ecosystem	20% (400M)	Dedicated to exchange liquidity, partnerships, and marketing acquisition.
Team & Founder	20% (400M)	Subject to a 12-month cliff and 24-month linear vesting.

Deflationary Protocols & Burn Mechanisms

- **Withdrawal Fees:** External wallet extractions incur a processing fee.
- **Burn Protocol:** 50% of all platform withdrawal fees are permanently destroyed (burned).
- **Ecosystem Reinvestment:** The remaining 50% is funneled into the project development fund.
- **Premium & Merch Utility (Q2–Q3 2027):** Up to 50% of net profits generated from JamStep Premium subscriptions and merchandise sales will be dynamically allocated to buy back \$JAMP tokens from open markets and permanently burn them.

06 High-Velocity Roadmap

Q2–Q3 2026**Testing Phase & Alpha Season (MVP)**

- Telegram Mini-App deployment with 200+ active beta testers.
- Official launch of Alpha Season featuring 2X JAMP Step Rewards.
- Deployment of the viral Referral Link and Invitation Bonus system.

Q4 2026**Product Development & Expansion**

- Scale the codebase into native iOS/Android mobile software.
- Launch Website 2.0 and official Token Registration on the BNB Chain.
- Scale early user traction to 5,000 active users.

Q1 2027**Scaling, TGE & Global Listing**

- Public launch of native iOS/Android apps with automated step tracking.
- Target Token Generation Event (TGE) and initial exchange listing.

Q2–Q3 2027**Ecosystem Staking & Utility**

- Activate staking mechanisms, in-app utility upgrades, and exclusive NFT reward collections.
- Scale the global community base to 50,000+ active participants.

07 Legal & Corporate Structure

JamStep is engineered on principles of complete operational transparency. To preserve institutional compliance, secure investor rights, and execute legal clarity, the project establishes its corporate foundation within the premier UAE (Dubai) jurisdiction.

08 Executive Leadership Team

■ Jamshid Mavlanov

Founder / Strategic Architect

■ Sanchilan Elvis

Project Manager / Operations & Community Lead

■ Umar Nuralibekov

Head of UX/UI Design

■ Jasur

Lead Backend Developer / Head of Communications

■ Shakhruh

Marketing Director
